

**Legend**

- 4 Unaffected female offspring
- 5 Affected female offspring
- 6 Unaffected male offspring
- 7 Affected male offspring
- ID of unaffected female
- ID of affected female
- ID of unaffected male
- ID of affected male
- ID of female founder
- ID of male founder
- ID of founder of unknown gender

**Graphical presentation of a swine melanoma population by Pedigraph version 1.1, developed by John Garbe and Yang Da of the University of Minnesota**  
 This graphic and the Pedigraph program are available at <http://animalgene.umn.edu>  
 The authors wish to thank Cargill for financial support, and Dr. C. Beattie of the University of Nevada-Reno and Dr. M. Amos of Texas A&M University for providing the swine melanoma data and permission to distribute this pedigree graphic.
